

Oil Field Environmental Incident Summary

Incident: 20140730191115 **Date/Time of Notice:** 07/30/2014 19:11

Responsible Party: ONEOK Rockies Midstream

Well Operator:

Well Name:

Field Name:

Well File #:

Date Incident: 7/30/2014

Time Incident: 17:00

Facility ID Number:

County: MCKENZIE

Twp: 150

Rng: 100

Sec: 32

Qtr: SE SW

Location Description: Head west out of Arnegard, ND on Highway 85 to McKenzie County Road 17 and take a right. Head north for approximately 2 miles and take a right on 30th Street (County Road 20). Travel 1/4 mile east and the site will be north of the gravel road.

Submitted By: Mitch Anderson

Received By:

Contact Person: Mitch Anderson
2700 Lincoln Avenue SE
Sidney, MT 59270

General Land Use: Cultivated

Affected Medium: Topsoil

Distance Nearest Occupied Building: 1 Mile

Distance Nearest Water Well: 1 Mile

Type of Incident: Pipeline Leak

Release Contained in Dike: Yes - On Pipeline ROW

Reported to NRC: No

	Spilled	Units	Recovered	Units	Followup	Units
Oil						
Brine						
Other	2	Barrels	2	Barrels		

Description of Other Released Contaminant:

Natural Gas Liquids (Condensates)

Inspected:

Written Report Received:

Clean Up Concluded:

Risk Evaluation:

There were no immediate hazards to public health nor injuries to workers.

Areal Extent:

The aerosolized mist was broadcast onto adjacent topsoil approximately 150'L x 75'W x 1/16"D.

Potential Environmental Impacts:

There were no environmental impacts to groundwater or surface waters.

Action Taken or Planned:

The pipeline was isolated and allowed to de-pressurize so repairs to the pipe can be implemented.

Wastes Disposal Location: Contaminated soils above the action levels will be transported off-site to a licensed landfill.

Agencies Involved: McKenzie County LEPC Director

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Pipeline hit during delineation sampling of Statoil saltwater spill (see incident # 20140725105423). Four rollofs were filled with impacted material, and one pile of impacted soil still on site next to excavation will also be removed for disposal. Recommended a liner be placed under the impacted soil; cleanup personnel will be excavating 3 inches below the pile to remove any clean soil now impacted by the pile placed on it. Spray from line hit went southeast; vegetation has been removed in this direction. Vegetation further to the southeast shows no visible impact.

Date: 8/19/2015 **Status:** Inspection
